

# Innovative Healthcare Solutions

REDUCE CLAIM DENIALS AND INCREASE REVENUE

## Company Overview

Innovative Healthcare Solutions takes on the revenue cycle management process, so medical practices can focus on spending more time with patients. From prescheduling to cash posting, we can help at any point in the revenue cycle. Claim denial management is very time-consuming and requires a certain level of expertise. The process can be very intimidating, and difficult to navigate. Our team takes on that burden for physicians and hospitals, so they can focus on patients. We take pride in holding insurance companies responsible to pay the full amount on time.

## Our Center of Excellence

IHS robust capabilities and flexible delivery models provide clients with a wide range of Revenue Cycle Services to address their business needs. Whether it is Insurance Verification, Claims Follow up, or Coding, we deliver cost-effective results on-time and within budget.
